Michele,

It looks like I can't show much detail for D4 because staff is still working on the data. I can present general updates later in the meeting.

The rest of the districts are shown in the attachments.

Also, we studied all the new fields after 1983 and came up with 29 new fields that were not part of the primacy document. We have so far identified only the Van Ness Slough field in D5 where an active injector is located.

My call-in number is 916-322-3145.

Jerry
